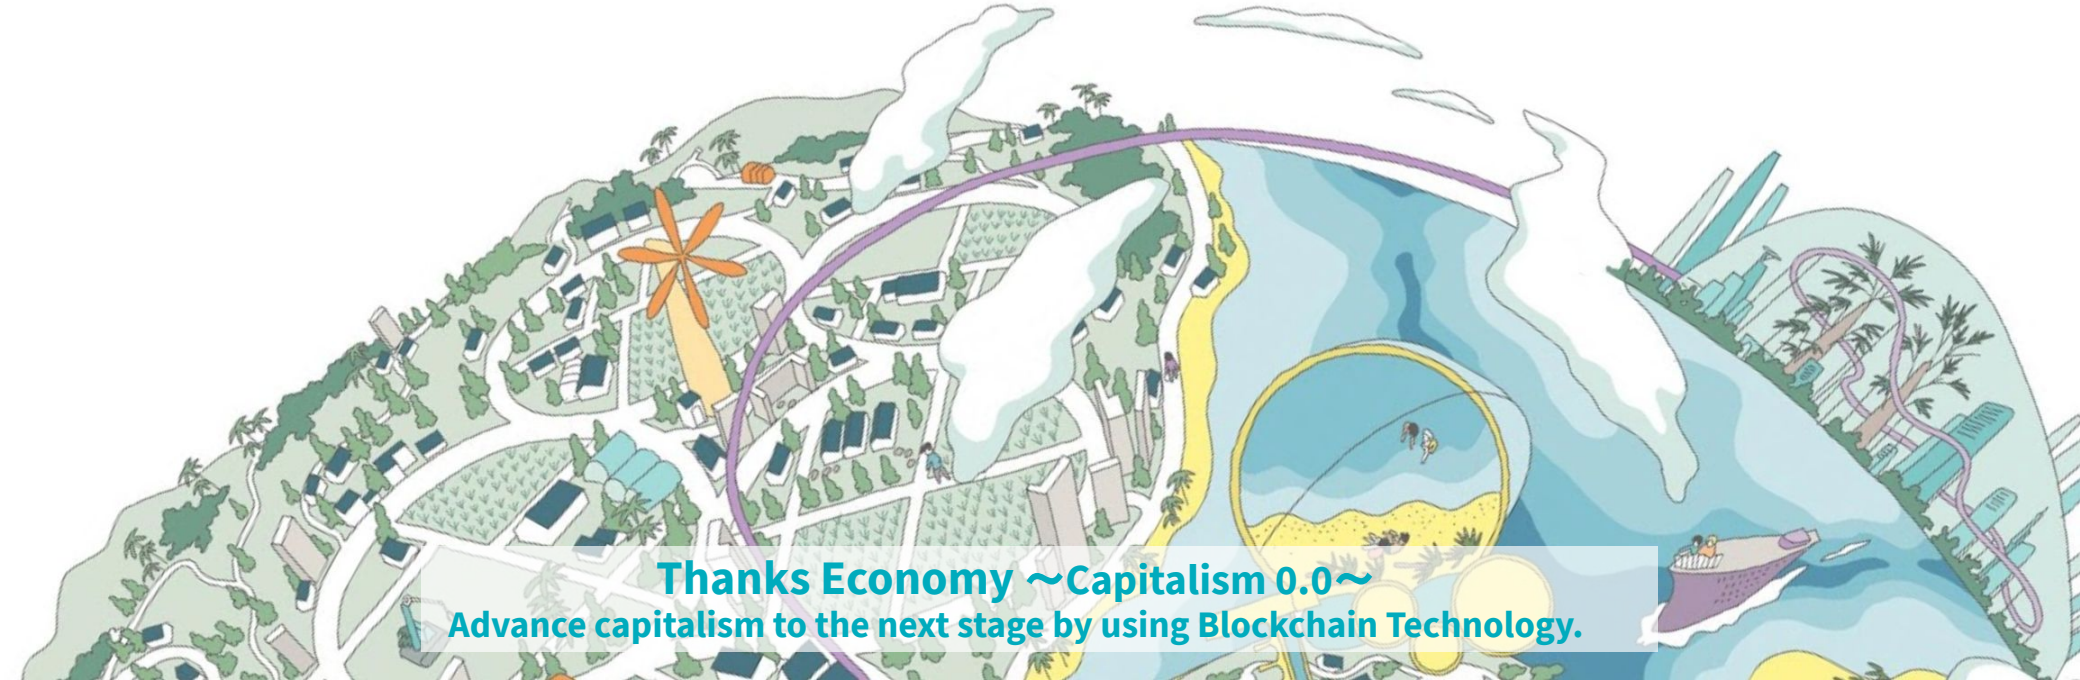
PEACE COIN

The More Money you Spend, the More Affluent you will Be 「 PEACE COIN 」



Thanks Economy ～Capitalism 0.0～

Advance capitalism to the next stage by using Blockchain Technology.

Affluence means “Circulation”

Everything is **circulating** in an **Affluent Society.**

Society without Circulation

Keeping money and things won’t make you happy. If neither information nor communication flows, you will feel more lonely.

Why do we need PEACE COIN?

We are in a society where things that cannot be measured by money cannot have values

Earning/Saving money efficiently → Valuable → Less Circulation

Mutual Aid → Cannot earn money → Less Valuable → Insecure Feeling

The More Money you Spend, the More Affluent you will Be

If people earn **Money that increases just by spending,**

how will their behavior change?

If Money increases easily, people's anxiety will be reduced.

Money **circulates** more and can be used for their likes and favorites. People will have more roles and places to be, which makes the society more **affluent.**

Sustainable System

- Even if some users attempt Loop Attack, it won't pay due to remittance fees.
- It doesn't mean the total supply will increase forever because the token not be used will decrement
- **Only the necessary amount of Token will circulate** because of the system where the used Token increments and the stagnant Token decrements.

e.g.) Increment 10%/month, Decrement 1.5%/week
(converge in approx. 600 days)

Characteristics of PEACE COIN

It is a **“TOKEN DESIGN PLATFORM”** using Blockchain, for the purpose of evaluating values that have not been visualized so far.

- **Unique system : “the more you use the Token, the more you will get”**
- **If you don’t use the Token, it will decrement, which promotes the circulation of community economy**
- **Original Token can be issued easily.**

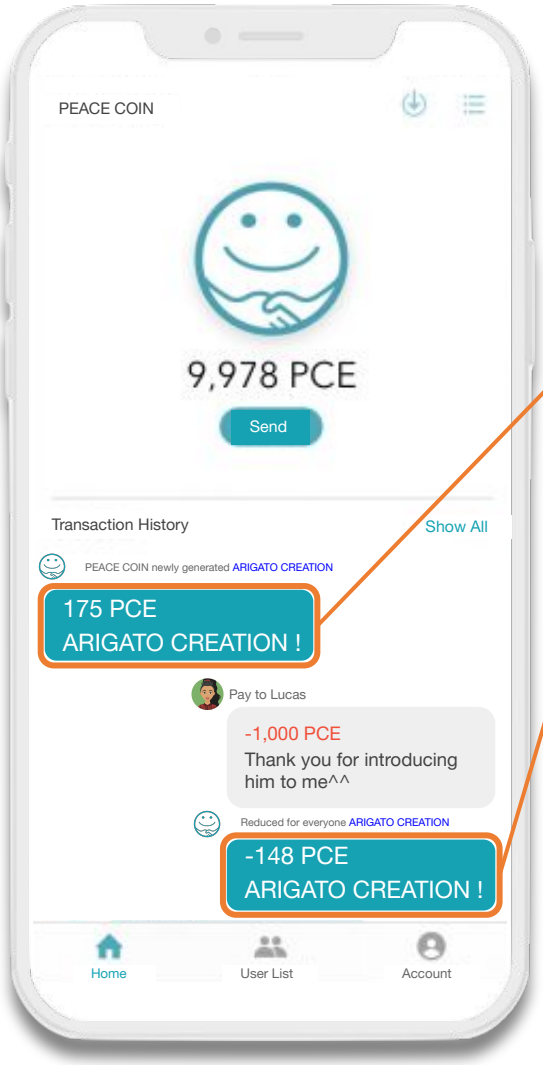
「 PEACE COIN Wallet 」



Once you send PEACE COIN,
Token **increments** **at a rate proportional to the sent amount** with a message of "ARIGATO CREATION"

Token **decrements** once a week

Members

Members with total 35 years of financial, 58 years of IT, 8 years of Blockchain Industry Experience

Ryoichi Abe
Founder / CEO

Serial Entrepreneur / International Financial Consultant
Born in 1983. After graduating from university, he joined an independent investment advisory company. He promoted to the project manager in the shortest time in history, and became the youngest executive officer. After he became independent, he established more than 10 new businesses in various business fields such as finance, M&A, real estate, and education, mainly in Asia. To bring diversity into the existing capitalist system, and to create a humane society where people recognize each other, he founded PEACE COIN.

Takeo Hiramatsu
Blockchain Engineer

Masahiro Chiba
Lead Engineer

Munehiro Kobayashi
Data Scientist
Ph.D in Science

ADVISER

Dr. Gilson Schwartz
Games for Change Latin America/President

Dr. Remi Ohshima
Ph.D. in Psychology
